Thin Solid Films 360 (2000) 301–305

thin solid films

www.elsevier.com/locate/tsf

Subject Index of Volume 360

Activation energy
Icosahedral Al–Mn phases grown in diffusion-limited conditions, 46
Air/water interface
Dissociation constants of aromatic carboxylic acids spread at the air/water interface, 261
Al_2O_3 gate insulator
Fabrication of a depletion mode GaAs MOSFET using Al_2O_3 as a gate insulator through the selective wet oxidation of AlAs, 229
Alkali–halide substrates
A three-step process for epitaxial growth of (111)-oriented C_{60} films on alkali–halide substrates, 28
Aromatic carboxylic acids
Dissociation constants of aromatic carboxylic acids spread at the air/water interface, 261
Atomic force microscopy
The role of trimethylgallium flow during nucleation layer deposition in the optimization of epitaxial GaN films, 34
X-ray reflectivity study on TiN/Ti/Si structures before and after annealing, 89
Anisotropic tribological properties of the coating on a magnetic recording disk, 187

Boron nitride
Growth of CN_x/BN:C multilayer films by magnetron sputtering, 17

C–N films
Effect of substrate temperature on the deposition of C–N films by pulsed high-temperature C–H–N Plasma CVD, 52
Cadmium
Porous CdS:CdO composite structure formed by screen printing and sintering of CdS in air, 128
Cadmium sulfide
Porous CdS:CdO composite structure formed by screen printing and sintering of CdS in air, 128
Carbon
Diamond-like film as a corrosion protective layer on the hard disk, 173
Anisotropic tribological properties of the coating on a magnetic recording disk, 187
Study of diamond-like carbon films on $LiNbO_3$, 274
Carbon nitride
Growth of CN_x/BN:C multilayer films by magnetron sputtering, 17
Hydrophobic CN_x thin film growth by inductively-coupled RF plasma enhanced pulsed laser deposition, 82

(111)-oriented C_{60} films
A three-step process for epitaxial growth of (111)-oriented C_{60} films on alkali–halide substrates, 28
CdS thin films
Reflection properties of oriented thin CdS films formed by laser ablation, 222
CeO_2
Effects of deposition parameters on the crystallinity of CeO_2 thin films deposited on Si(100) substrates by r.f.-magnetron sputtering, 154
CeO_2(200)
Effects of deposition parameters on the crystallinity of CeO_2 thin films deposited on Si(100) substrates by r.f.-magnetron sputtering, 154
Chalcone
Stability of second-order nonlinear optical properties in solgel matrix bearing silylated chalcone and disperse red 1, 213
Chemical vapor deposition
Deposition kinetics of silicon dioxide from tetraethylorthosilicate by PECVD, 60
Atomic layer deposition of tungsten using sequential surface chemistry with a sacrificial stripping reaction, 145
Coatings
Microstructural evolution in lubricious ZnO films grown by pulsed laser deposition, 107
Conducting polymer
Fabrication of self-assembled polyaniline films by doping-induced deposition, 24
Conductivity
Enhancement of conductivity stability of polypyrrole films modified by valence copper and polyethylene oxide in an oxygen atmosphere, 1
Copper
Enhancement of conductivity stability of polypyrrole films modified by valence copper and polyethylene oxide in an oxygen atmosphere, 1
Electrodeposition of copper on Poly(*o*-aminophenol) modified platinum electrode, 159
Electrical properties of Ta_2O_5 thin films deposited on Cu, 268
Corrosion
Diamond-like film as a corrosion protective layer on the hard disk, 173
Crystal direction
Reflection properties of oriented thin CdS films formed by laser ablation, 222
Crystallization
Electrodeposition of copper on Poly(*o*-aminophenol) modified platinum electrode, 159

PII: S0040-6090(00)00647-7

Degradation
Enhancement of conductivity stability of polypyrrole films modified by valence copper and polyethylene oxide in an oxygen atmosphere, 1
Diamond-like carbon films
Study of diamond-like carbon films on $LiNbO_3$, 274
Dielectrics
Growth of $SrTiO_3$ thin films on $LaAlO_3$(001) substrates; the influence of growth temperature on composition, orientation, and surface morphology, 181
Thin film interaction between low-*k* dielectric hydrogen silsesquioxane (HSQ) and Ti barrier layer, 283
Diffusion
Icosahedral Al–Mn phases grown in diffusion-limited conditions, 46
$DiIC_{12}$
Near-field microscopy of collapsed Langmuir–Blodgett films, 139
Dissociation constant
Dissociation constants of aromatic carboxylic acids spread at the air/water interface, 261
Doping
Doping effects on the optical properties of evaporated a-Si:H films, 293

Electrical properties
Electrical properties of Ta_2O_5 thin films deposited on Cu, 268
Electrical properties and measurements
Characterization of indium zinc oxide thin films prepared by pulsed laser deposition using a $Zn_3In_2O_6$ target, 233
Epitaxial bilayered Nb–Mo(001) films: growth, characterization and size effect in electron conductivity, 278
Electrochemistry
Electrodeposition of copper on Poly(*o*-aminophenol) modified platinum electrode, 159
Electron microscopy
Microstructural evolution in lubricious ZnO films grown by pulsed laser deposition, 107
Ellipsometry
Spectroscopic ellipsometry of TiO_2 layers prepared by ion-assisted electron-beam evaporation, 96
Atomic layer deposition of tungsten using sequential surface chemistry with a sacrificial stripping reaction, 145
Deposition and modification of titanium dioxide thin films by filtered arc deposition, 241
Epitaxial growth
A three-step process for epitaxial growth of (111)-oriented C_{60} films on alkali–halide substrates, 28
Epitaxy
Epitaxial growth of $SrTiO_3$ films with different orientations on TiN buffered Si(001) by pulsed laser deposition, 103
Epitaxial bilayered Nb–Mo(001) films: growth, characterization and size effect in electron conductivity, 278

Fluorescence near-field scanning optical microscopy
Near-field microscopy of collapsed Langmuir–Blodgett films, 139
Fluorides
Microstructure and composition of MgF_2 optical coatings grown on Si substrate by PVD and IBS processes, 133
Fourier transform infrared spectroscopy
Deposition kinetics of silicon dioxide from tetraethylorthosilicate by PECVD, 60
Atomic layer deposition of tungsten using sequential surface chemistry with a sacrificial stripping reaction, 145
Study of diamond-like carbon films on $LiNbO_3$, 274

GaAS MOSFET
Fabrication of a depletion mode GaAs MOSFET using Al_2O_3 as a gate insulator through the selective wet oxidation of AlAs, 229
GaN
The role of trimethylgallium flow during nucleation layer deposition in the optimization of epitaxial GaN films, 34
Gas sensor
The effect of NO_2 doping on the gas sensing properties of copper phthalocyanine thin film devices, 10
Glow discharge
An investigation of the optical properties of plasma-polymerized diphenyl thin films, 69

Hardness
Anisotropic tribological properties of the coating on a magnetic recording disk, 187
Hot wire chemical vapor deposition
Microstructures of microcrystalline silicon thin films prepared by hot wire chemical vapor deposition, 205
Hydrophobic CN_x thin film
Hydrophobic CN_x thin film growth by inductively-coupled RF plasma enhanced pulsed laser deposition, 82

Icosahedral phases
Icosahedral Al–Mn phases grown in diffusion-limited conditions, 46
Indium tin oxide
Improved ITO thin films with a thin ZnO buffer layer by sputtering, 75
Indium-zinc oxide
Characterization of indium zinc oxide thin films prepared by pulsed laser deposition using a $Zn_3In_2O_6$ target, 233
Inductively coupled RF plasma source
Hydrophobic CN_x thin film growth by inductively-coupled RF plasma enhanced pulsed laser deposition, 82
Infrared spectroscopy
An investigation of the optical properties of plasma-polymerized diphenyl thin films, 69
Iron oxide
Formation of a highly oriented FeO thin film by phase transition of Fe_3O_4 and Fe nanocrystallines, 118

Langmuir monolayers
Dissociation constants of aromatic carboxylic acids spread at the air/water interface, 261
Langmuir–Blodgett films
Near-field microscopy of collapsed Langmuir–Blodgett films, 139
The gas sensitivity of a metal-insulator-semiconductor field-effect-transistor based on Langmuir–Blodgett films of a new asymmetrically substituted phthalocyanine, 256

Laser ablation
Pulsed laser deposition of YBCO thin films in a shadow mask configuration, 166
Reflection properties of oriented thin CdS films formed by laser ablation, 222
Characterization of indium zinc oxide thin films prepared by pulsed laser deposition using a $Zn_3In_2O_6$ target, 233

Liquid-condensed domains
Near-field microscopy of collapsed Langmuir–Blodgett films, 139
Liquid-expanded domains
Near-field microscopy of collapsed Langmuir–Blodgett films, 139
Luminescence
Sol–gel deposition and characterization of Mn^{2+}-doped silicate phosphor films, 39

Manganese
Sol–gel deposition and characterization of Mn^{2+}-doped silicate phosphor films, 39
Metal oxide chemical vapour deposition
The role of trimethylgallium flow during nucleation layer deposition in the optimization of epitaxial GaN films, 34
Metallization
Thin film interaction between low-*k* dielectric hydrogen silsesquioxane (HSQ) and Ti barrier layer, 283
Microcrystalline silicon
Microstructures of microcrystalline silicon thin films prepared by hot wire chemical vapor deposition, 205
Microstructures
Microstructures of microcrystalline silicon thin films prepared by hot wire chemical vapor deposition, 205
Modification
Enhancement of conductivity stability of polypyrrole films modified by valence copper and polyethylene oxide in an oxygen atmosphere, 1
Molecular beam epitaxy
Structural characterization of molecular beam epitaxy grown ZnSe-based layers on GaAs substrates for blue–green laser diodes, 195
Fabrication of a depletion mode GaAs MOSFET using Al_2O_3 as a gate insulator through the selective wet oxidation of AlAs, 229
Molybdenum
Epitaxial bilayered Nb–Mo(001) films: growth, characterization and size effect in electron conductivity, 278
Monolayer
A three-step process for epitaxial growth of (111)-oriented C_{60} films on alkali–halide substrates, 28
Preparation of rare-earth carbonate nanosized particles monolayer by using potentiostatic technique, 56
Multilayers
Growth of CN_x/BN:C multilayer films by magnetron sputtering, 17

Nanoindentation
Growth of CN_x/BN:C multilayer films by magnetron sputtering, 17
Nanosized particles
Preparation of rare-earth carbonate nanosized particles monolayer by using potentiostatic technique, 56
Niobium
Epitaxial bilayered Nb–Mo(001) films: growth, characterization and size effect in electron conductivity, 278
Nitrogen content
Hydrophobic CN_x thin film growth by inductively-coupled RF plasma enhanced pulsed laser deposition, 82
Nitrogen dioxide
The effect of NO_2 doping on the gas sensing properties of copper phthalocyanine thin film devices, 10
Non-linear optical properties
Stability of second-order nonlinear optical properties in solgel matrix bearing silylated chalcone and disperse red 1, 213
Non-linear optics
Pulsed laser deposition of a thin conjugated-polymer film, 13
Nucleation
Electrodeposition of copper on Poly(*o*-aminophenol) modified platinum electrode, 159
Nucleation layer
The role of trimethylgallium flow during nucleation layer deposition in the optimization of epitaxial GaN films, 34

Optical coatings
Photo-electrocatalytic degradation of 4-chlorophenol over sputter deposited Ti oxide films, 250
Optical properties
Spectroscopic ellipsometry of TiO_2 layers prepared by ion-assisted electron-beam evaporation, 96
An investigation of the optical properties of plasma-polymerized diphenyl thin films, 69
Characterization of indium zinc oxide thin films prepared by pulsed laser deposition using a $Zn_3In_2O_6$ target, 233
Deposition and modification of titanium dioxide thin films by filtered arc deposition, 241
Doping effects on the optical properties of evaporated a-Si:H films, 293
Optical spectroscopy
Pulsed laser deposition of a thin conjugated-polymer film, 13
Optoelectronic devices
Structural characterization of molecular beam epitaxy grown ZnSe-based layers on GaAs substrates for blue–green laser diodes, 195
Organic semiconductors
The gas sensitivity of a metal-insulator-semiconductor field-effect-transistor based on Langmuir–Blodgett films of a new asymmetrically substituted phthalocyanine, 256
Oxides
Growth of $SrTiO_3$ thin films on $LaAlO_3$(001) substrates; the influence of growth temperature on composition, orientation, and surface morphology, 181
Electrical properties of Ta_2O_5 thin films deposited on Cu, 268

Phase transitions
Formation of a highly oriented FeO thin film by phase transition of Fe_3O_4 and Fe nanocrystallines, 118

Photocatalysis
Photo-electrocatalytic degradation of 4-chlorophenol over sputter deposited Ti oxide films, 250
Phthalocyanine
The effect of NO_2 doping on the gas sensing properties of copper phthalocyanine thin film devices, 10
Physical vapour deposition
Microstructure and composition of MgF_2 optical coatings grown on Si substrate by PVD and IBS processes, 133
Plasma deposition and processing
Deposition kinetics of silicon dioxide from tetraethylorthosilicate by PECVD, 60
An investigation of the optical properties of plasma-polymerized diphenyl thin films, 69
Poly(styrenesulfonic acid)
Fabrication of self-assembled polyaniline films by doping-induced deposition, 24
Polyaniline
Fabrication of self-assembled polyaniline films by doping-induced deposition, 24
Polyethylene oxide
Enhancement of conductivity stability of polypyrrole films modified by valence copper and polyethylene oxide in an oxygen atmosphere, 1
π-conjugated polymer
Pulsed laser deposition of a thin conjugated-polymer film, 13
Polythiophene
Pulsed laser deposition of a thin conjugated-polymer film, 13
Preferred orientation
Effects of deposition parameters on the crystallinity of CeO_2 thin films deposited on Si(100) substrates by r.f.-magnetron sputtering, 154
Pulsed laser ablation
Hydrophobic CN_x thin film growth by inductively-coupled RF plasma enhanced pulsed laser deposition, 82
Pulsed laser deposition
Pulsed laser deposition of a thin conjugated-polymer film, 13
Epitaxial growth of $SrTiO_3$ films with different orientations on TiN buffered Si(001) by pulsed laser deposition, 103
Pulsed high-temperarure plasma CVD
Effect of substrate temperature on the deposition of C–N films by pulsed high-temperature C–H–N Plasma CVD, 52

r.f.-magnetron sputtering
Effects of deposition parameters on the crystallinity of CeO_2 thin films deposited on Si(100) substrates by r.f.-magnetron sputtering, 154
Rare-earth carbonate
Preparation of rare-earth carbonate nanosized particles monolayer by using potentiostatic technique, 56
Reactive deposition
Reactive sputter deposition of titanium dioxide, 122
Reflection
Reflection properties of oriented thin CdS films formed by laser ablation, 222
Resistivity
Improved ITO thin films with a thin ZnO buffer layer by sputtering, 75
Thin film interaction between low-*k* dielectric hydrogen silsesquioxane (HSQ) and Ti barrier layer, 283
Selective wet thermal oxidation
Fabrication of a depletion mode GaAs MOSFET using Al_2O_3 as a gate insulator through the selective wet oxidation of AlAs, 229
Self-assembly
Fabrication of self-assembled polyaniline films by doping-induced deposition, 24
Semiconductors
Porous CdS:CdO composite structure formed by screen printing and sintering of CdS in air, 128
Sensors
The gas sensitivity of a metal-insulator-semiconductor field-effect-transistor based on Langmuir–Blodgett films of a new asymmetrically substituted phthalocyanine, 256
Si(100)
Effects of deposition parameters on the crystallinity of CeO_2 thin films deposited on Si(100) substrates by r.f.-magnetron sputtering, 154
Silicate thin film
Sol–gel deposition and characterization of Mn^{2+}-doped silicate phosphor films, 39
Silicon carbide
Study of diamond-like carbon films on $LiNbO_3$, 274
a-Si:H
Doping effects on the optical properties of evaporated a-Si:H films, 293
Silicon oxide
Deposition kinetics of silicon dioxide from tetraethylorthosilicate by PECVD, 60
Sol–gel
Stability of second-order nonlinear optical properties in solgel matrix bearing silylated chalcone and disperse red 1, 213
Sol–gel process
Sol–gel deposition and characterization of Mn^{2+}-doped silicate phosphor films, 39
Sputter deposition
Reactive sputter deposition of titanium dioxide, 122
Sputtering
Growth of CN_x/BN:C multilayer films by magnetron sputtering, 17
Improved ITO thin films with a thin ZnO buffer layer by sputtering, 75
Microstructure and composition of MgF_2 optical coatings grown on Si substrate by PVD and IBS processes, 133
Growth of $SrTiO_3$ thin films on $LaAlO_3$(001) substrates; the influence of growth temperature on composition, orientation, and surface morphology, 181
Photo-electrocatalytic degradation of 4-chlorophenol over sputter deposited Ti oxide films, 250
$SrTiO_3$
Epitaxial growth of $SrTiO_3$ films with different orientations on TiN buffered Si(001) by pulsed laser deposition, 103
Structural properties
Deposition and modification of titanium dioxide thin films by filtered arc deposition, 241
Substrate temperature
Effect of substrate temperature on the deposition of C–N films by pulsed high-temperature C–H–N Plasma CVD, 52
Superconductivity
Pulsed laser deposition of YBCO thin films in a shadow mask

configuration, 166
Surface acoustic wave
Study of diamond-like carbon films on $LiNbO_3$, 274
Surface defects
Diamond-like film as a corrosion protective layer on the hard disk, 173
Surface morphology
Pulsed laser deposition of YBCO thin films in a shadow mask configuration, 166
Surface roughness
X-ray reflectivity study on TiN/Ti/Si structures before and after annealing, 89
Growth of $SrTiO_3$ thin films on $LaAlO_3$(001) substrates; the influence of growth temperature on composition, orientation, and surface morphology, 181
Anisotropic tribological properties of the coating on a magnetic recording disk, 187

Tantalum
Electrical properties of Ta_2O_5 thin films deposited on Cu, 268
Thin films
The effect of NO_2 doping on the gas sensing properties of copper phthalocyanine thin film devices, 10
Doping effects on the optical properties of evaporated a-Si:H films, 293
TiO_2
Reactive sputter deposition of titanium dioxide, 122
Titania
Reactive sputter deposition of titanium dioxide, 122
Titanium
Thin film interaction between low-*k* dielectric hydrogen silsesquioxane (HSQ) and Ti barrier layer, 283
Titanium nitride
Epitaxial growth of $SrTiO_3$ films with different orientations on TiN buffered Si(001) by pulsed laser deposition, 103
Titanium oxide
Spectroscopic ellipsometry of TiO_2 layers prepared by ion-assisted electron-beam evaporation, 96
Deposition and modification of titanium dioxide thin films by filtered arc deposition, 241
Photo-electrocatalytic degradation of 4-chlorophenol over sputter deposited Ti oxide films, 250
Transmission electron microscopy
Growth of CN_x/BN:C multilayer films by magnetron sputtering, 17
X-ray reflectivity study on TiN/Ti/Si structures before and after annealing, 89
Microstructure and composition of MgF_2 optical coatings grown on Si substrate by PVD and IBS processes, 133
Structural characterization of molecular beam epitaxy grown ZnSe-based layers on GaAs substrates for blue–green laser diodes, 195
Tribology
Microstructural evolution in lubricious ZnO films grown by pulsed laser deposition, 107
Tungsten
Atomic layer deposition of tungsten using sequential surface chemistry with a sacrificial stripping reaction, 145

X-ray diffraction
Icosahedral Al–Mn phases grown in diffusion-limited conditions, 46
Formation of a highly oriented FeO thin film by phase transition of Fe_3O_4 and Fe nanocrystallines, 118
Porous CdS:CdO composite structure formed by screen printing and sintering of CdS in air, 128
X-ray photoelectron spectroscopy
Formation of a highly oriented FeO thin film by phase transition of Fe_3O_4 and Fe nanocrystallines, 118
X-ray reflectivity
X-ray reflectivity study on TiN/Ti/Si structures before and after annealing, 89
X-ray reflectivity study on TiN/Ti/Si structures before and after annealing, 89

Zinc oxide
Improved ITO thin films with a thin ZnO buffer layer by sputtering, 75
Microstructural evolution in lubricious ZnO films grown by pulsed laser deposition, 107
